# How import Project to Android Studio?

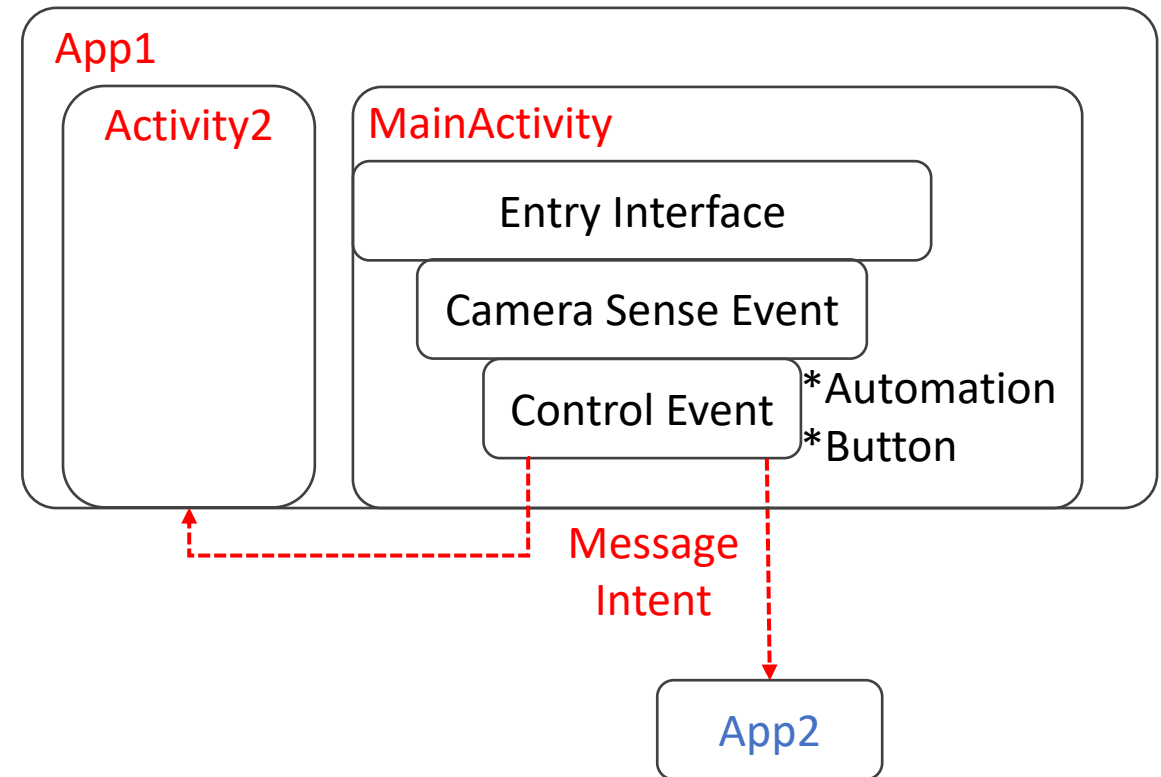

# QRTest1-- Read QR Code Example

APP1—Activity1

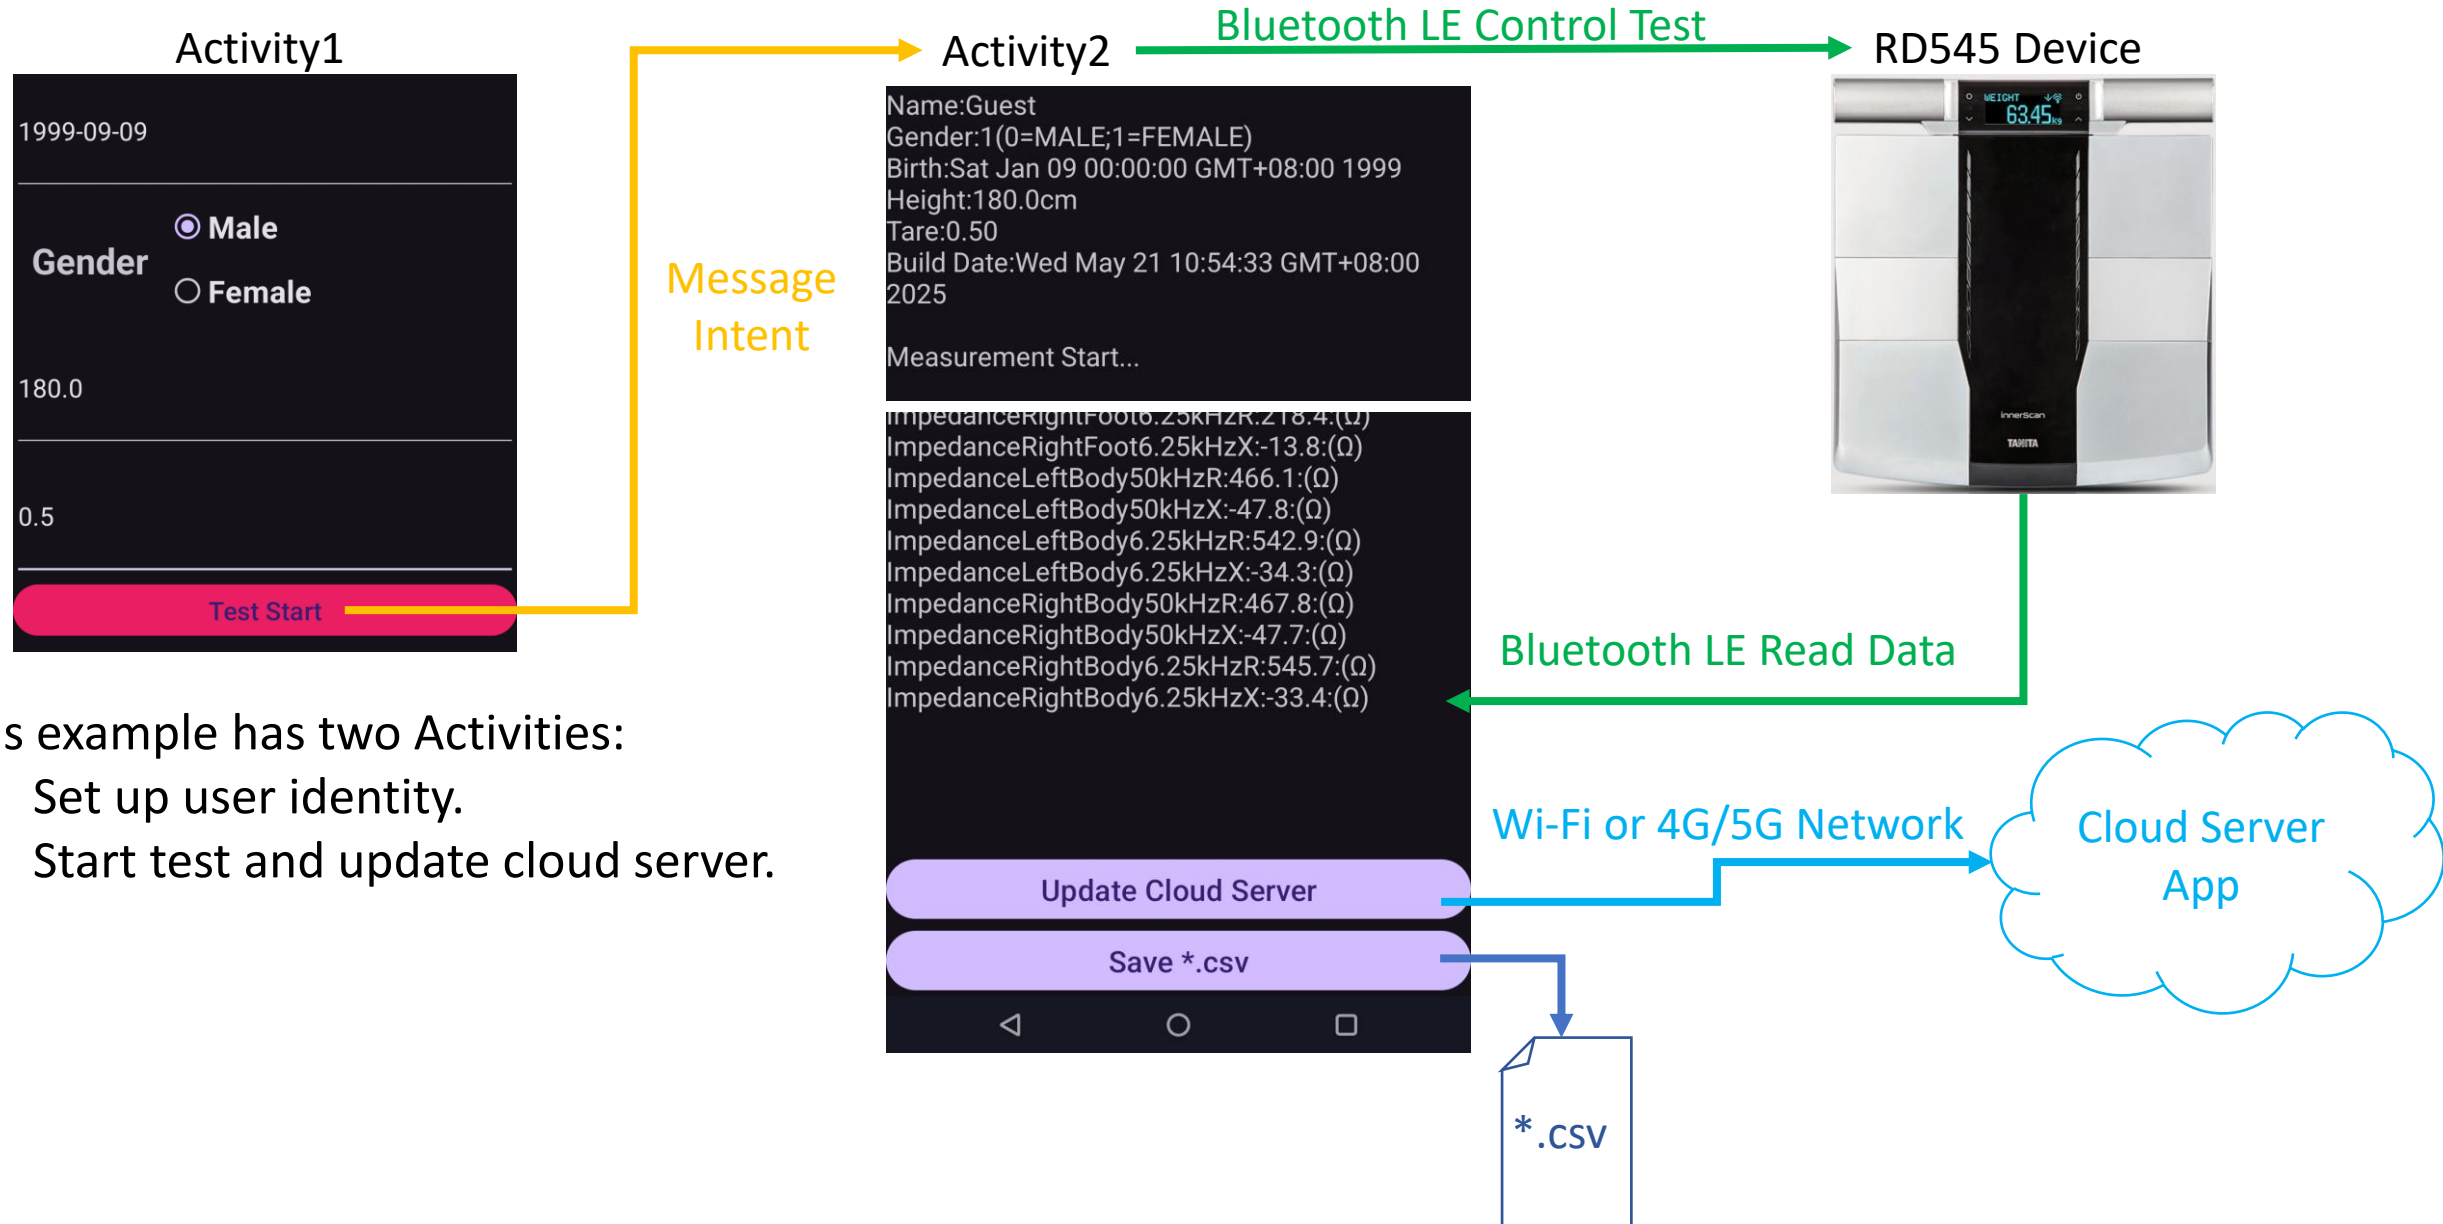

APP1—Activity2 or APP2

Most of the time, APP1 and APP2 are produced by two different unit engineers.

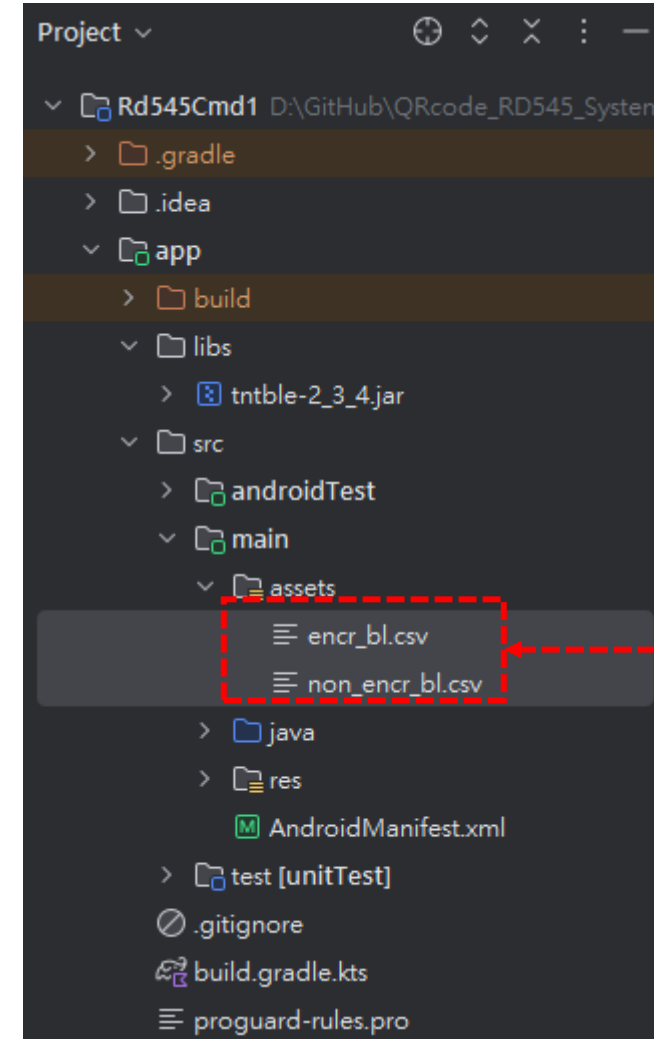

Therefore, Intent method is needed to call the other party's APP and transmit messages.

# Rd545cmd1-- Rd545 Api call Example

# Rd545cmd1-- Rd545 Api call Example

## Api Setting

# QRTest1(App1) Call Rd545cmd1(App2)

# QRTest1(App1) Call Rd545cmd1(App2)

App1:Activity1 Button Event change call Object.

```
35      public class MainActivity extends AppCompatActivity {
151          public void BtnClick(View v)
152      {
153          Intent intent = new Intent(packageContext: this, MeasurementActivity.class);
154          intent.putExtra(name: "key", textView.getText());
155          startActivity(intent);
156          /*
157          Intent intent = new Intent();
158          intent.setComponent(new ComponentName(
159              "wi.ki.rd545cmd1", // package name of APP2
160              "wi.ki.rd545cmd1.MeasurementActivity" // call to Activity2 Name of APP2
161          ));
162          String[] parts = textView.getText().toString().split("\\|");
163          intent.putExtra("Phone", parts[0]);
164          intent.putExtra("Area", parts[1]);
165          intent.putExtra("Gender", parts[2]);
166          intent.putExtra("Birthday", parts[3]);
167          intent.putExtra("Height", parts[4]);
168          intent.putExtra("Weight", parts[5]);
169          intent.putExtra("ClothesWeight", parts[6]);
170          startActivity(intent);
171          */
172      }
173  }
```

← This Code is call Activity2 of App1.

← This Code is call Activity2 of App2.

# QRTest1(App1) Call Rd545cmd1(App2)

App2:Activity2 external call permission settings

```
AndroidManifest.xml x
2  <manifest xmlns:android="http://schemas.android.com/apk/res/android"
